CEA (Centro Energie Alternative) investe il proprio *know-how* nella ricerca e nello sviluppo di soluzioni tecnologiche per la progettazione. La sua *expertise* risale al settore termoidraulico e della progettazione impiantistica, in cui si fondono conoscenza tecnica ed esigenze architettoniche. La ricerca e le specifiche sul prodotto sono accurate e volte a supportare il lavoro di cantiere, con risposte di semplificazione, immediatezza e garanzia di funzionamento. Numerosi i brevetti di invenzione industriale e modelli di utilità, che consentono una spiccata flessibilità progettuale e l'abbattimento dei tempi di cantiere.

/

CEA (Centro Energie Alternative) invests its know-how in the research and development of technological solutions for project design. The origins of its expertise trace back to its experiences in the plumbing and installation planning fields, combining technical know-how and architectural demands. The internal research into the product and its peculiarities is careful and aims at supporting the construction work, through simplification, rapid installation and guaranteed operation. Several industrial and utility patents enable a flexible approach to planning and reduce the time of construction.

CEA si confronta quotidianamente con esperienze reali per fare cultura di prodotto e sviluppare nuove consapevoli idee progettuali. Le tematiche di innovazione tecnologica, sostenibilità e ricerca estetica sono alla base dello studio con le università e degli eventi di formazione organizzati con studi di architettura e rivenditori di tutto il mondo.

/

CEA deals with real experiences to enhance a culture of product and share it for the development of new aware project ideas. The themes of technological innovation, sustainability and aesthetic are the founding elements of the research set with universities and training events organized with architect studios and retailers worldwide.

Geometrie semplici e lineari dimostrano la conoscenza profonda del linguaggio del *design* e dialogano con l'architettura oltre il tempo. Le collezioni CEA permettono al progettista e all'*interior designer* una libertà stilistica e di combinazione di prodotto, che conferiscono ampio spazio alle idee per dare forma alla loro realizzazione.

/

Simple and linear geometries demonstrate a deep knowledge of design and can dialogue with architecture beyond time. With CEA collections, architects and designers get a total freedom of style and product combination, which gives wide space to ideas and shape to their realisation.

CEA produce totalmente nel distretto bassanese della Regione del Veneto, centro rinomato per tradizione metalmeccanica, dove qualità e affidabilità sono sinonimo di sinergie locali. Una produzione all'insegna della precisione e dell'ingegneria costruttiva, che coniuga sapere artigiano, innovazione tecnologica e sostenibilità.

/

CEA totally produces in the Bassano del Grappa district of the North East of Italy, worldwide renowned area for the mechanical engineering tradition, where quality and reliability derive from local synergies. The production process is characterised by precision and manufacturing engineering: simplicity and craftsmanship guide technological innovation and sustainability.

Per domare l'acqua, CEA sceglie l'acciaio inossidabile AISI 316/L, materiale ad altissime prestazioni e totalmente riciclabile. La cura nella scelta di materie prime a basso contenuto di carbonio permette a CEA di non aggiungere verniciature, trattamenti galvanici o trasformazioni chimiche al processo produttivo. Il risultato è una gamma prodotto fortemente igienica, atossica e totalmente riciclabile.

/

To master the flow of water, CEA chooses AISI 316/L stainless steel, a totally recyclable and highly performing material. The raw material, characterised by low levels of carbon, is carefully selected and enables CEA not to involve hot melting, painting, galvanic treatment or other chemical processes during production. Resulting CEA taps do not to release any toxic elements into water, are highly hygienic and totally recyclable.

La caratteristica durezza dell'acciaio inossidabile AISI 316/L garantisce una lunga durata dei prodotti CEA nel tempo, resistente a graffi e scalfitture, agenti esterni, salsedine ed acque sulfuree. Le caratteristiche del materiale sono la prima garanzia della qualità dei prodotti CEA, eterni ed ecologici.

/

The distinctive hardness of the AISI 316/L stainless steel guarantees long life of CEA products over time, resistance to scratches and nicks, external agents, saltiness and sulphurous waters. The characteristics of the material represent the primary guarantee of CEA products quality, eternal and eco-friendly.

In tutta la collezione CEA l'erogazione dell'acqua è regolata da aeratori e limitatori, che riducono la portata del flusso a 5 lt/min, e da cartucce idropgressive, che mantengono costante il getto a 5 lt/min, permettendo la regolazione della temperatura con un solo gesto. Entrambi i sistemi assicurano un notevole risparmio idrico rispetto ai tradizionali miscelatori.

/

In CEA product range, the water flow is adjusted by aerators and limiters (reducing the flow to 5 l/min) and by progressive cartridges (allowing a constant water flow to 5 l/min while permitting temperature adjustment, with just one movement). Both systems ensure a remarkable water saving, compared to traditional taps.

CEA lavora l'acciaio a freddo, senza influenzare il surriscaldamento termico ambientale. Il processo produttivo aziendale prevede l'utilizzo esclusivo di fonti energetiche rinnovabili certificate, la raccolta differenziata dei rifiuti ed il risparmio dell'acqua, per ridurre l'impatto dell'azienda sull'ecosistema. Tramite centri di lavoro a controllo numerico (torni, fresa e tagli al laser) la precisione e la qualità della lavorazione conseguono eccellenti risultati. Anche le finiture sono ottenute per procedimenti meccanici ecocompatibili.

/

CEA adopts only cold working methods for stainless steel and does not influence global warming. All the energy that powers production is certified clean, water is saved and waste is separated to be recycled, to reduce the impact of the company on the ecosystem. Thanks to precision CNC machines (lathes, milling and laser cutting) the quality of the production process achieves excellent results. Finishes are also obtained through environmentally-friendly mechanical processes.

LA FORZA INNOVATIVA DELLA TECNOLOGIA

/

THE POWER OF TECHNOLOGICAL INNOVATION

Le collezioni CEA esprimono una forte attitudine alla tecnologia applicata a funzionalità e a reinterpretazione del prodotto. Grazie all'expertise maturata in cantiere e alla continua ricerca di nuovi materiali, sistemi di funzionamento, tecnologie idrauliche e tecniche costruttive, l'azienda ha registrato numerosi brevetti di invenzione industriale e modelli di utilizzo. Le parti ad incasso CEA garantiscono velocità e facilità di installazione, precisione ed abbattimento dei tempi di cantiere. L'utilizzo di materiali alternativi conferisce originalità e creatività alle collezioni CEA.

PTR
(PLUMBING TELESCOPIC
REGULATOR)

Corpo incasso universale che permette una regolazione in profondità nella parete non modificando l'estetica del prodotto. Con il PTR è possibile intercambiare fra loro numerose collezioni. Inoltre, si ottiene un vantaggio straordinario nei lavori di cantiere, evitando l'utilizzo di prolunghe e di strumenti da taglio per adattare la parte incasso alla rubinetteria e quindi accorciando i tempi di lavoro. Il PTR è un modello di utilità CEADESIGN.

The PTR is a universal built-in part that allows adjustability in its depth into the wall and is also interchangeable with a number of collections. The PTR is a great advantage on the building site, it avoids the use of extensions and cutting tools to adapt the built-in part to the taps and also reduces installation time. The PTR is a CEADESIGN utility model.

Raccordo universale all'impianto idraulico che permette un innesto rapido del rubinetto a parete ed una conseguente velocità e facilità dell'installazione. Con il PWF la miscelazione dell'acqua rimane esterna al muro ovviando ogni tipo di problematica connessa all'installazione della rubinetteria a parete. Il PWF è un brevetto CEADESIGN di invenzione industriale.

The PWF is a universal fitting that enables a quick and easy connection of the tap to the wall. With PWF system, the mixing parts of the tap, including the cartridge, are located at the front of the wall. The PWF is fully adjustable and this removes any problems of fitting the tap to un-even or un-level walls. It also makes any future service requirements very easy. The PWF is a patent by CEADESIGN for industrial invention.

The CEA collection of taps expresses a strong attitude for functional technology and product re-interpretation. Thanks to CEA's expertise gained on construction sites and via the continuous research for new materials, operation systems, hydraulic technologies and manufacturing techniques, the company has registered several industrial and utility patents. The CEA built-in parts ensure fast and easy installation, precision, and a reduction of time on the construction site. The use of alternative materials ensure the CEA collections are original and creative.

UCS
(UNIVERSAL CARTRIDGE
SYSTEM)

STOP VALVE SYSTEM

Corpo incasso universale privo di finitura estetica, intercambiabile rispetto alle collezioni CARTESIO, INNOVO, MILO360 e GASTONE. Inoltre, con il corpo ad incasso UCS è possibile bloccare la temperatura massima dell'acqua tramite la regolazione di un ghiera posta sulla cartuccia miscelatrice. UCS è un brevetto CEADESIGN di invenzione industriale.

The UCS is a universal built-in part without aesthetic finish, interchangeable across CARTESIO, INNOVO, MILO360 and GASTONE collections. In addition, with the UCS built-in part the maximum water temperature can be lock by adjusting a metal ring placed on the mixer cartridge. The UCS is a patent by CEADESIGN for industrial invention.

INC

BOX

IRS
(INFRARED SENSOR)

HYDROPLATE

Staffa di fissaggio per l'ancoraggio di colonne doccia/vasca, bocche di erogazione, doccini e soffioni su pareti, controsoffitti e pavimenti.

The INC is a fixing bracket used to anchor shower and bathtub fittings, including water spouts, hand showers and shower heads on to the walls, false-ceilings and floors.

Sistema di installazione della rubinetteria a parete tramite una scatola vuota a incasso per l'alloggiamento dei tubi flessibili. Il BOX non include cartucce di miscelazione dell'acqua che sono invece fornite con la parte esterna del rubinetto.

The BOX installation system is used for wall-mounted taps and includes a built-in empty box where the supply hoses of the hot and cold water are located. The BOX system also allows all working parts of the tap to be located at the front of the wall, which assists with any future service requirements.

FIX

Rubinetto termostatico con sistema di chiusura automatica dell'acqua. Il SISTEMA STOP VALVE permette di evitare la chiusura dell'impianto al momento dell'estrazione della cartuccia per la manutenzione straordinaria. Sistema certificato per il mercato americano. Brevetto di invenzione industriale CEADESIGN.

The thermostatic mixer with automatic STOP VALVE SYSTEM. It permits to avoid the plumbing closure during the cartridge pulling out for the extraordinary maintenance. Certificate system for american market. CEADESIGN patent for industrial invention.

Doppia staffa di fissaggio ausiliaria opzionale ad "L" da utilizzarsi a completamento delle staffe di fissaggio di PTR, PWF,

UCS e INC. FIX permette la regolazione e il fissaggio della rubinetteria in profondità, verso l'alto e il basso, e verso sinistra e destra su strutture in cartongesso/fibrogesso.

Optional auxiliary fixing with double "L" bracket to be used with built-in parts PTR, PWF, UCS e INC. It allows faucet regulation in depth, upward and downward, leftward and rightward, for the fixing on plasterboard /fiber-board structures.

Sistema di rilevazione di presenza a raggi infrarossi alimentato a batteria con voltaggio 9 volt o corrente elettrica, abbinabile a erogazioni da piano, parete, soffitto e pavimento. Il sensore può essere posizionato sul piano o sul fronte di un top e azionabile rispettivamente avvicinando il palmo della mano al sensore o avvicinando il corpo in prossimità del lavabo.

The IRS is a presence detection system using infrared technology and is powered with 9 volts or standard electric current. The IRS can be combined with wall, deck or ceiling mounted outlets and can also be used with freestanding taps. The sensor can be placed vertically on the wall or horizontally on the countertop. The sensor is activated when a hand or other body part comes close to the sensor location, which then in turn activates the tap.

HYDROPLATE è un innovativo programma di placche per cassetta WC, dotate di pulsanti a filo e idroscopino a scomparsa per la pulizia del WC e per l'igiene intima. Brevetto di invenzione industriale di CEADESIGN, HYDROPLATE non necessita di predisposizione impiantistica né di opere murarie poiché si collega all'impianto della cassetta WC. Il risparmio idrico è garantito dal doppio flusso a 3 e 6 lt della cassetta. Completano la gamma gli idroscopini ad incasso o esterni abbinabili alle diverse collezioni di accessori CEA. /

The HYDROPLATE is an innovative program of WC flush plates for use with concealed cisterns. They are equipped with flush buttons and a rollaway water jet cleaner which can be used to clean the WC or for personal hygiene. A CEADESIGN industrial invention patent, the HYDROPLATE takes its water supply directly from the pipe that is feeding the concealed cistern. Water saving is guaranteed by the 3 l and 6 l dual flush capacity of the concealed cistern. The range is completed with the built-in or external water jet cleaners, which also match the different CEA accessory collections.

WOOD ESSENCES

Miscelatore a piano monocomando con bocca girevole per getto a zampillo. La torsione della bocca di erogazione permette una riduzione del flusso dell'acqua a 3 lt/min. Ruotando di 180°, l'erogazione dell'acqua raggiunge una portata di 4 lt/min per facilitare l'uso dello zampillo nella gestualità quotidiana. Modello ornamentale CEADESIGN. È un progetto di Natalino Malasorti.

/
Deck mounted single-lever mixer with swivelling spout for gush flow. The rotation of the spout permits a reduction of the water flow to 3 l/min. Rotating the spout of 180 ° the water flow reaches 4 l/min to facilitate the gush use in daily gestures. CEADESIGN ornamental model. Design by Natalino Malasorti.

Miscelatore monocomando a piano o a parete con spessore 20 mm, brevetto CEADESIGN. L'innovazione industriale riguarda la possibilità di avere un comando di miscelazione che regola portata dell'acqua e temperatura con due diverse gestualità, rispettivamente un cursore di apertura e chiusura e un moto di rotazione per regolare la temperatura dell'acqua. Con questi due diversi movimenti CEA inventa un modo nuovo di utilizzare il miscelatore mantenendo ingombri minimi di spessore del prodotto stesso.

/
Product collection characterized by the circle/square dualism, emphasized by the difference of satin finish for the former and polished for the latter. The two forms are combined giving three-dimensionality to the faucet handle. CEADESIGN ornamental model. Design by Mario Tessarollo and Daniela Lorato.

Collezione prodotto caratterizzata dal dualismo cerchio/quadrato, enfatizzata dalla differenza di finitura satinata per l'uno e lucidata per l'altro. Le due forme si innestano tra loro conferendo tridimensionalità alla maniglia del rubinetto. Modello ornamentale CEADESIGN. È un progetto di Mario Tessarollo e Daniela Lorato.

/
Made by CEADESIGN STUDIO and characterized by an integrated plate in the shaft of the hand shower. The water flow produces a particularly soft aerated gush. The hose is available with stainless steel version (FRE94) and colored silicone rubber (FRE95). CEADESIGN ornamental model.

Prodotto realizzato da CEADESIGN STUDIO e caratterizzato da un disco integrato nell'asta del doccino. L'erogazione produce un getto areato particolarmente morbido. Il tubo flessibile è disponibile nella versione con treccia inox (FRE94) e in gomma siliconica colorata (FRE95). Modello ornamentale CEADESIGN.

/
Made by CEADESIGN STUDIO and characterized by an integrated plate in the shaft of the hand shower. The water flow produces a particularly soft aerated gush. The hose is available with stainless steel version (FRE94) and colored silicone rubber (FRE95). CEADESIGN ornamental model.

Esclusiva finitura nera di CEA per l'acciaio inox effettuata tramite trattamento di deposizione per evaporazione. Enfatizza le naturali qualità del materiale risaltandone la finitura satinata o lucidata. Effettuata tramite trattamento di deposizione per evaporazione, garantisce durezza, lucentezza attraverso un film biocompatibile che riveste la superficie.

/
Stainless steel finish that emphasizes the natural qualities of the material, highlighting the satin or polished treatments. Resulting from a deposition process through evaporation, it guarantees the hardness and the gloss through a biocompatible film that coats the steel surface.

Finitura applicata all'acciaio inox che enfatizza le naturali qualità del materiale risaltandone la finitura satinata o lucidata. Effettuata tramite trattamento di deposizione per evaporazione, garantisce durezza, lucentezza attraverso un film biocompatibile che riveste la superficie.

/
Exclusive CEA black finish for stainless steel resulting from a deposition process through evaporation. It emphasizes the natural qualities of the material, highlighting the satin or polished finish. A biocompatible film based on graphite and diamond powder, increases the gloss and the hardness of the surface. The result is an extraordinary resistance to acid, basic solutions and solvents, safety from nicks and scratches, self-lubrication against water lime scales.

ROVERE, TEAK BIRMANO, NOCE AMERICANO e WENGÉ sono le quattro esclusive essenze che CEA abbina ai comandi delle collezioni GIOTTO, ZIQQ e BAR. Il binomio Acciaio/Legno prosegue il percorso dell'azienda e ribadisce l'ecologia quale *fil rouge* di tutta la sua produzione. La scelta ecosostenibile si riflette sia nel processo di selezione che nella lavorazione del prodotto. Il legno massello stagionato, proveniente da foreste certificate, è trattato con vernici all'acqua brevettate, prive di solventi. Come l'acciaio inossidabile, anche il legno si contraddistingue per durezza, ottimo grado di stabilizzazione rispetto ad umidità e temperatura, impermeabilità e resistenza a soluzioni acide e saline. Queste caratteristiche rendono il prodotto adatto anche all'ambiente marino.

/
OAK, BURMA TEAK, AMERICAN WALNUT AND WENGE are the four exclusive wood species CEA teams up with the controls of GIOTTO, ZIQQ and BAR collections. The Steel/Wood combination continues to characterize the design experience of the company and further confirms environmental awareness as being the connective thread of the entire production. The eco-sustainable approach is reflected in the selection of raw materials and manufacturing processes. Mature solid wood, sourced from certified forests, is treated with patented water-based and solvent-free varnishes. Similarly to stainless steel, the wood also stands out for its hardness, together with an excellent degree of stability in the presence of humidity or extreme temperatures and resistance to acidic and saline solutions. These characteristics also make our products ideal for the marine environment.

MASSIMA LIBERTÀ
COMPOSITIVA
/
MAXIMUM FREEDOM
OF COMPOSITION

FREE IDEAS è un concetto sviluppato da CEA per garantire al progettista la massima libertà compositiva. Molti prodotti CEA sono trasversali ed il loro utilizzo si estende a tutte le collezioni. In questo modo, ogni singola collezione amplia la propria gamma compositiva e presta le proprie erogazioni a tutte le altre serie di prodotto.

/
FREE IDEAS is a concept developed by CEA to ensure the maximum freedom of composition for the designer. A wide range of CEA products are transversal as their use extends to all product collections. As a consequence, each collection is enriched with a wider range of possible compositions.

CEA lavora con e per i progettisti, per lasciare spazio alle idee e garantire la loro migliore realizzazione. La specificità di cantiere è occasione di confronto tra progettazione e cultura aziendale di prodotto, con il fine di ridurre tempi e costi di cantiere, per ottenere risultati di eccellenza.

CEAlab è il dipartimento di consulenza e sviluppo di progetto a supporto delle diverse fasi del lavoro di architetti e interior designer. Risponde all'email cealab@ceadesign.it

/
CEA works both with and for designers, so that their ideas are given free reign and their designs realised. The specification of the construction site is an opportunity for project design and culture of product to meet. This enables a reduction in time and cost of construction, which in turn creates excellent results. CEAlab is the company department of project consulting and development supporting the work of architects and interior designers at different phases through their projects. For project support, please contact cealab@ceadesign.it

LA PASSIONE PER L'ACCIAIO INOSSIDABILE / THE PASSION FOR STAINLESS STEEL

CEA sceglie l'acciaio inossidabile AISI 316/L per dare forma alle sue idee. La lavorazione a freddo e l'ausilio di macchine a controllo numerico sono sinonimo di precisione ed evoluzione tecnologica del prodotto CEA. Garanzia di qualità e di sostenibilità, l'acciaio inossidabile AISI 316/L è un materiale universalmente considerato ecologico se lavorato per lavorazione meccanica. Materiale inerte che non emette sostanze tossiche o nocive, l'acciaio inossidabile unisce l'elevata igienicità, intesa come efficacia antibatterica, alla resistenza alla corrosione grazie al film autoprotettivo che lo salvaguarda a contatto con l'aria. Le finiture che CEA adotta per le superfici delle sue collezioni sono realizzate a mano con spazzole che levigano, lucidano e satinano. La sapienza e l'esperienza dell'artigianato di CEA conferiscono qualità alla lavorazione.

CEA chooses AISI 316/L stainless steel to shape its own ideas. Cold working and the use of CNC machines are synonymous of precision and technological evolution of CEA product. AISI 316/L stainless steel is a guarantee of quality and sustainability and is widely considered an ecological material if mechanically manufactured. An inert material that does not release toxic or harmful substances, the stainless steel combines the high level of hygiene, understood as antibacterial efficacy, with the resistance to corrosion thanks to the self-protective film that protects it when in contact with air. CEA adopts handmade finishes for its collections obtained by smoothing, polishing and brushing. The wisdom and experience of CEA's craftsmanship ensures a quality production.

DANIELA LORATO

Rubinetteria in acciaio inossidabile
AISI 316/L finitura satinata con dettaglio in finitura lucidata. Per garantire il risparmio idrico, tutte le erogazioni lavabo e bidet hanno aeratori con portata del flusso a 5 lt/min, sostituibili con aeratori di portata superiore qualora le bocche di erogazione vengano utilizzate per il riempimento vasca. Sistema ad incasso PTR, modello di utilità CEADESIGN.

DESIGN
MARCIO KOGAN
/ STUDIO MK27

Rubinetteria in acciaio inossidabile AISI 316/L finitura satinata. L'erogazione perpendicolare al piano è generata da tre getti indipendenti, allineati tra loro e dotati di aeratore con limitatore di portata a risparmio idrico, per un consumo complessivo di 3 lt/min. Alla rotazione del deviatore, l'acqua viene direzionata verso uno solo di questi getti per un "effetto zampillo", riducendo il consumo a 1 lt/min. Nelle erogazioni vasca, il flusso è libero per favorire il rapido riempimento. Sistema ad incasso PTR, modello di utilità CEADESIGN.

DESIGN
NATALINO MALASORTI

Rubinetteria in acciaio inossidabile AISI 316/L finitura satinata e lucidata. Per tutte le maniglie dei miscelatori della collezione Gastone, CEA sceglie le vernici all'acqua, a basso impatto ambientale, quale trattamento di protezione e decorazione dell'acciaio. Per garantire il risparmio idrico, tutte le erogazioni lavabo e bidet hanno aeratori con portata del flusso a 5 lt/min, sostituibili con aeratori di portata superiore qualora le bocche di erogazione vengano utilizzate per il riempimento vasca. Sistema ad incasso UCS, brevetto di innovazione industriale CEADESIGN.

Taps in AISI 316/L stainless steel, satin and polished finish. For all handles of Gastone collection mixers, CEA chooses water-based varnishes, with low environmental impact, to protect and decorate the steel. In order to get water saving, all wash-basin and bidet spouts are equipped with aerators that limit the flow rate to 5 l/min. If the spouts are used for bath filling, aerators of greater flow rate are available. UCS built-in part system, CEADESIGN industrial innovation patent.
