goclean®

**Un inedito
e innovativo sistema
disponibile
su App e Link**

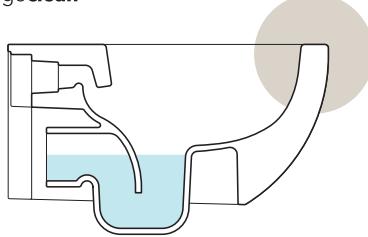

Per facilitare la pulizia del WC la Flaminia propone goclean®. Con l'eliminazione della brida, la superficie interna del WC rimane completamente a vista e senza parti nascoste. L'azienda ha adottato una soluzione che coniuga l'intensità del flusso dell'acqua e la sua dinamica, riuscendo ad ottenere un perfetto lavaggio. Il risultato è un WC dalle forme gradevoli e veloce da pulire. Questa soluzione tecnica, oggi **applicata alla collezione App e Link**, in futuro sarà disponibile anche su altre linee di sanitari.

Traditional

goclean®

goclean® Brand new, innovative system

To facilitate the cleaning of a toilet bowl, Flaminia proposes goclean®. With the elimination of the rim, the inner surface of the toilet bowl is entirely visible, with no hidden parts. The company has adopted a solution that ensures highly intense, efficient flushing, resulting in a perfectly clean toilet bowl. The outcome is a WC that is handsome and extremely easy to clean. This technical solution, **currently applied to the App and Link collections**, will soon become available on other lines of sanitary ware.

goclean® Un système inédit et innovant

Afin de faciliter le nettoyage des cuvettes de toilette, Flaminia propose goclean®. Grâce à l'élimination de la bride, la surface interne de la cuvette est totalement apparente et sans aucune partie cachée. L'entreprise a adopté cette solution car elle conjugue l'intensité et la dynamique du flux de la chasse pour un nettoyage parfait. Résultat, une cuvette de toilette aux formes agréables et rapide à nettoyer. Cette solution technique, **appliquée aujourd'hui aux collections App et Link**, sera disponible à l'avenir sur d'autres lignes de sanitaires.

goclean® Innovative Marktneuheit

goclean® ist ein System von Flaminia, das die Reinigung des WCs vereinfacht. Durch das randlose Design bleibt die gesamte Innenfläche des WCs sichtbar, ohne verborgene Nischen. Zusätzlich wurde eine Lösung implementiert, die die Intensität des Wasserstroms und dessen Dynamik aufeinander abstimmt, was den Reinigungseffekt potenziert. Das Ergebnis ist ein WC mit ansprechender Form, das sich außerdem schnell und effizient reinigen lässt. Diese technische Lösung, **die derzeit für die Kollektionen App und Link verfügbar ist**, wird in Zukunft auch für andere Sanitärkeramik-Serien erhältlich sein.
