

MAKRO
bathroom concepts

Questo catalogo vuole essere un riassunto della produzione generale. Per questo, pur nella difficoltà di far coesistere prodotti stilisticamente compiuti a elementi strettamente tecnici, si è cercato di far cogliere quanto ampia, articolata e trasversale sia la proposta che MAKRO offre ai suoi interlocutori, sempre fedele al proprio credo di rigorosa coerenza e visione unitaria. Uno strumento di lavoro indispensabile per capire e interpretare con la massima libertà le molteplici possibilità d'uso dei prodotti in collezione e con soluzioni progettuali inedite capaci di raccontare la stanza da bagno dell'abitare contemporaneo.

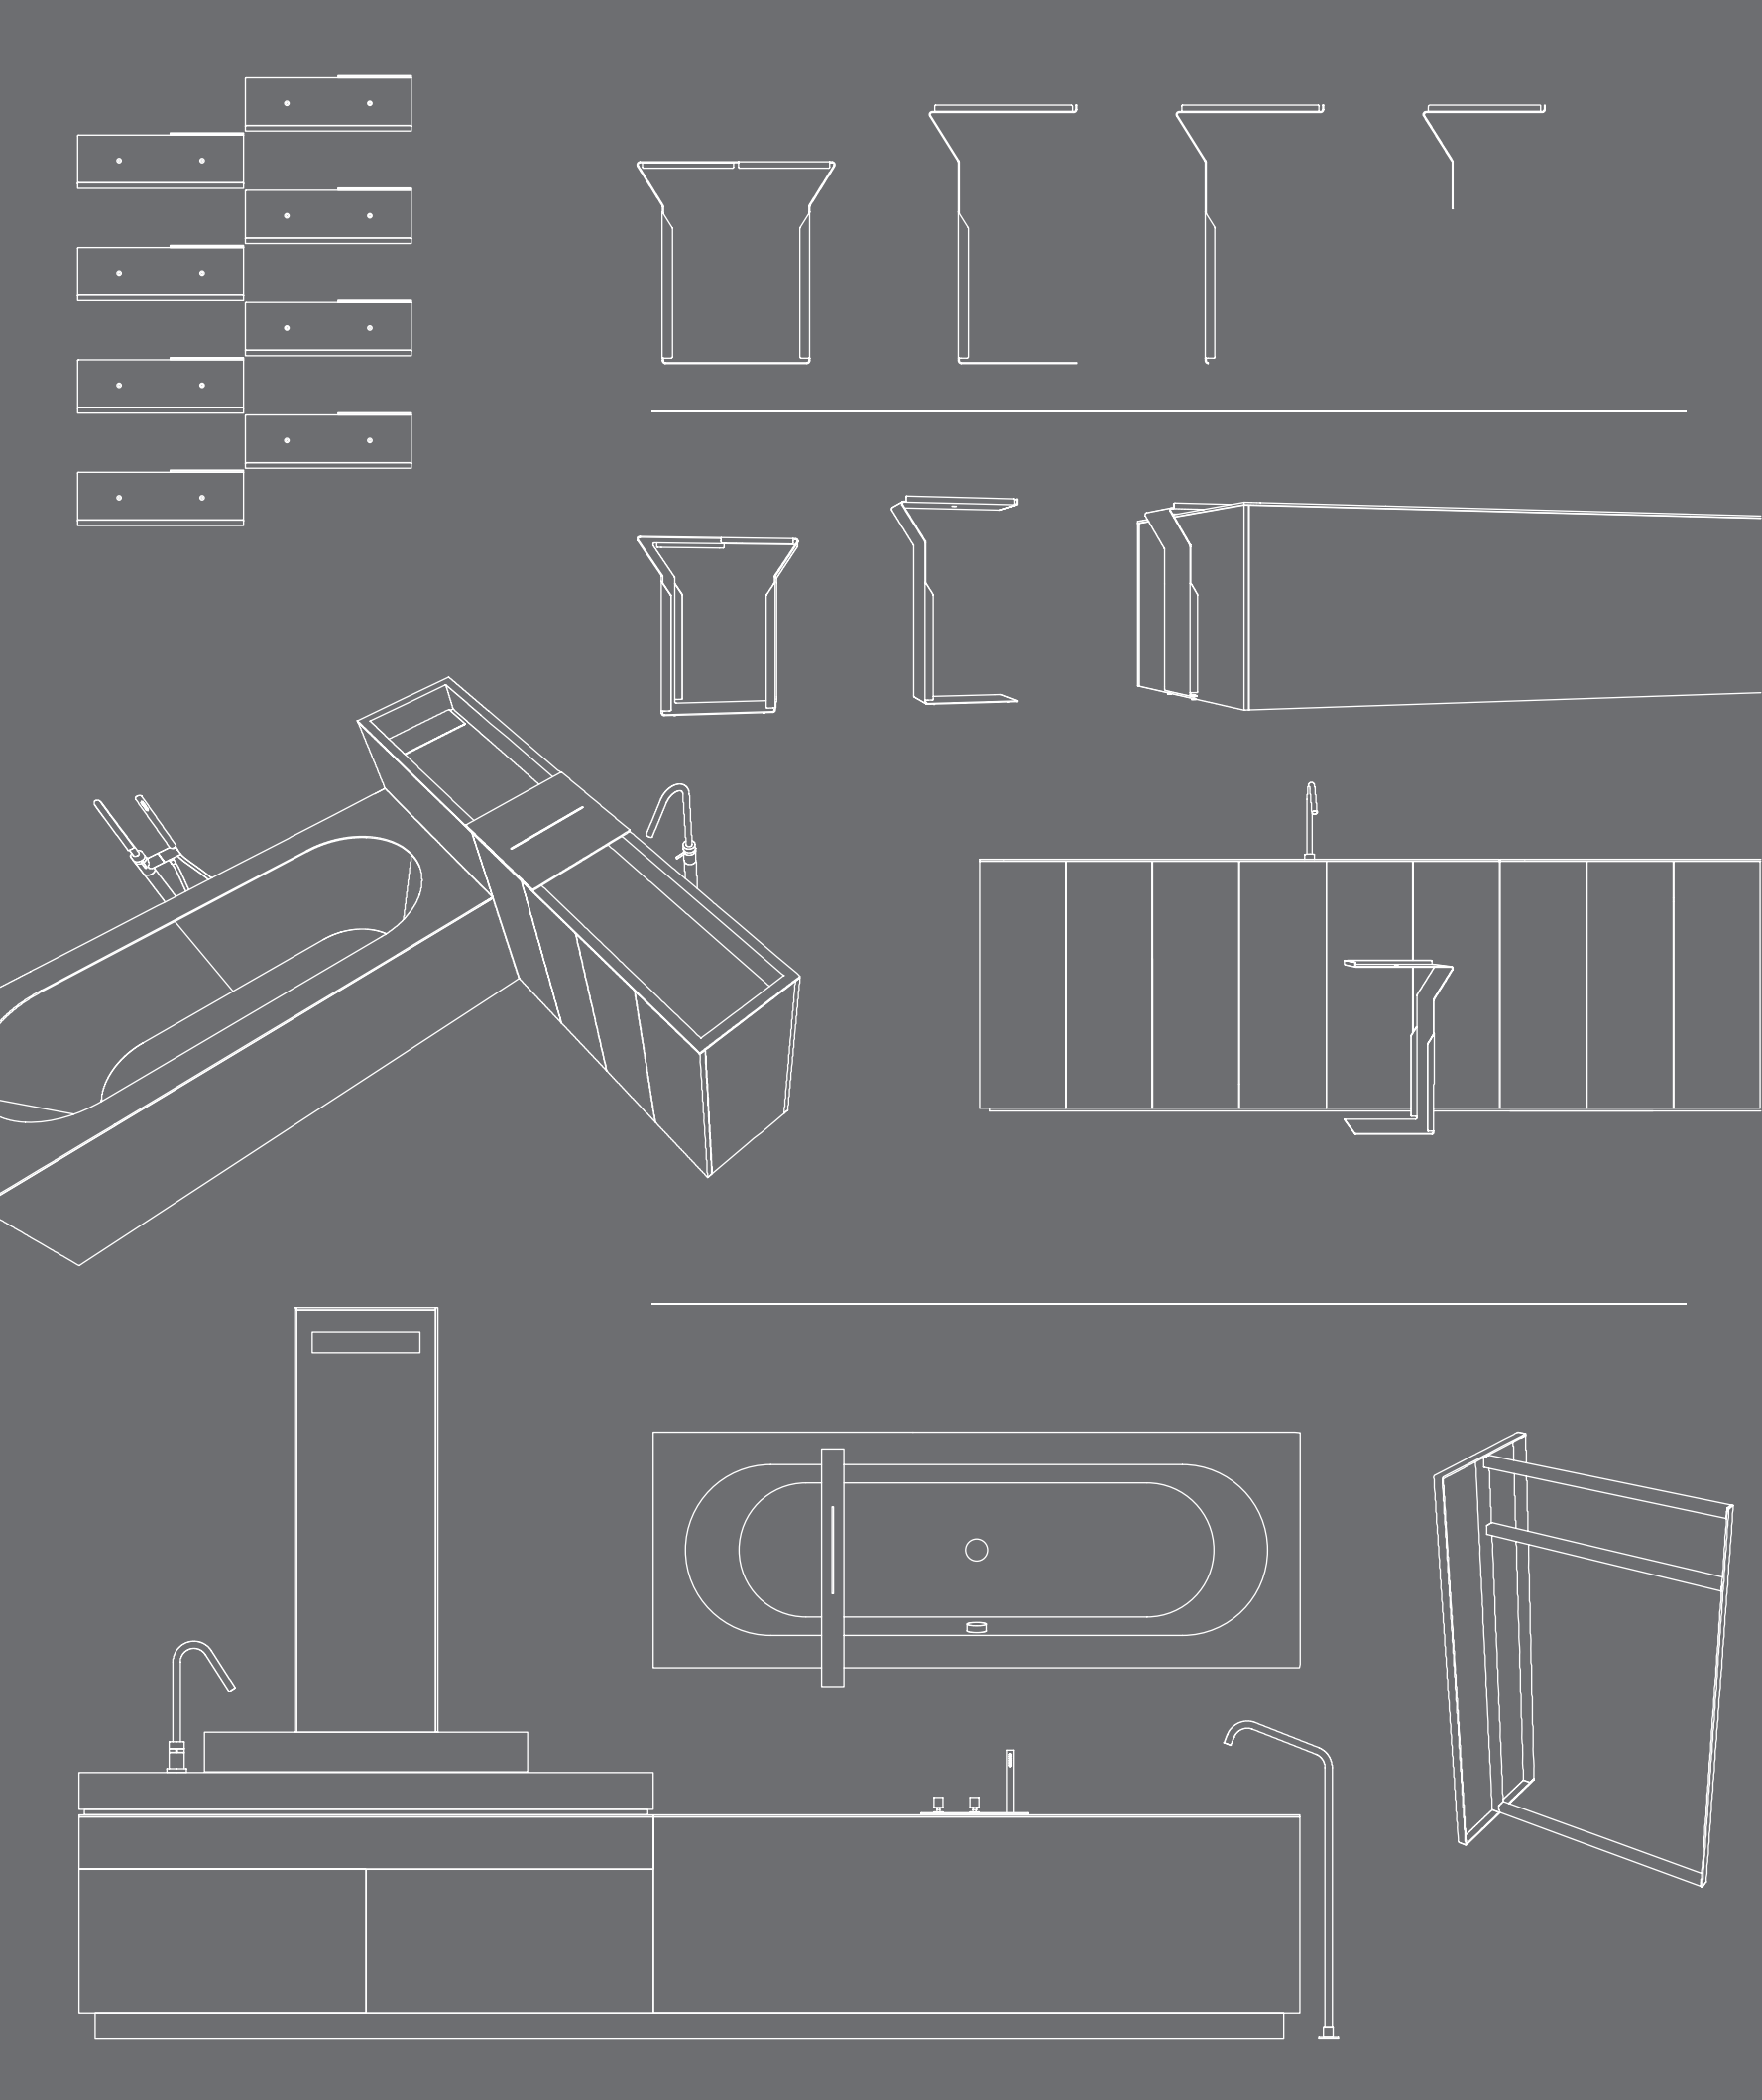

This catalogue summarises our general production. For this reason, although it is difficult for stylistically complete products to coexist with strictly technical elements, we have tried to make the wide, well-organised and transversal range offered by MAKRO easy to understand for its customers, in line with the company's philosophy of strict coherence and harmonious vision. This catalogue is an indispensable work tool to comprehend and freely interpret the many ways in which the products of the collection can be used; it also includes original planning ideas capable of composing bathrooms to suit contemporary lifestyles.

Este catálogo desea ser un resumen de la producción general. Por este motivo, a pesar de la dificultad de hacer coexistir productos que resalten el estilo de la marca con elementos estrictamente técnicos, hemos intentado reflejar la amplitud, la modularidad y la transversalidad de la gama que MAKRO ofrece a sus interlocutores, siempre fiel a su propia ideología de rigurosa coherencia y visión unitaria. Un instrumento de trabajo indispensable para comprender e interpretar con la máxima libertad las múltiples posibilidades de uso de los productos de la colección y con soluciones de proyecto inéditas capaces de reflejar el ambiente del baño en el estilo de vida contemporáneo.

L'IDEA

THE IDEA / LA IDEA

Una ricerca costante finalizzata al superamento di soluzioni e formalismi consolidati e rivolta a fornire nuovi e molteplici valori espressivi nella stanza da bagno è la filosofia di MAKRO. Innovazione, approfondimento tecnologico e creatività son la base di un incessante lavoro quotidiano di un affiatato team aziendale di designers, architetti e ingegneri in grado di condividere e supportare ogni fase di sviluppo del prodotto fino alla commessa piu' complessa. In tempi recenti l'Azienda ha intrapreso un percorso che coinvolge designers e progettisti internazionali in un libero scambio di stimoli, informazioni e conoscenze, capaci di ampliare questo pensiero.

MAKRO'S philosophy is based on constant research aimed at surpassing consolidated ideas and formalisms and directed to supplying new and multiple expressive values for the bathroom. Innovation, technological investigation and creativity are the corner stones of the unremitting daily work of a unified company team of designers, architects and engineers capable of sharing and backing up each product development phase, even when a request is really complicated. In recent times the Company has set off on a path that involves international designers and planners in a free exchange of stimuli, information and knowledge able to deepen this concept.

Una búsqueda constante finalizada a superar las soluciones y los formalismos consolidados, dirigida a ofrecer nuevos y múltiples valores expresivos en el cuarto de baño: esta es la filosofía de MAKRO. Innovación, profundo estudio tecnológico y creatividad constituyen la base del incesante trabajo cotidiano de un consolidado equipo empresarial de diseñadores, arquitectos e ingenieros capaz de compartir y apoyar cada fase de desarrollo del producto, hasta el más complejo de los pedidos. Recientemente la empresa ha emprendido un camino en el que participan diseñadores y proyectistas internacionales en un libre intercambio de estímulos, información y conocimientos capaces de ampliar este concepto.

L'AZIENDA

THE COMPANY / LA EMPRESA

MAKRO nasce a metà degli anni novanta con il preciso obiettivo di sviluppare concepts e prodotti innovativi per l'ambiente bagno, forte di una solida base formativa legata alla cultura del progetto e di esperienze imprenditoriali da parte dei soci fondatori. Sin dall'origine l'idea è sempre stata quella di realizzare prodotti con caratteristiche tecniche e costruttive di nuova concezione in grado di soddisfare sia l'atto progettuale sia le diverse problematiche di cantiere. E' con questi presupposti, oltre ad una approfondita e costante ricerca, che sono stati concepiti, realizzati e industrializzati una serie di prodotti, inizialmente vasche e docce sottopiano, che hanno segnato in maniera radicale un nuovo modo di pensare, progettare ed arredare lo spazio del bagno. Con una precisa e decisa connotazione estetica, un design rigoroso per un pubblico raffinato ed esigente i prodotti sono stati apprezzati dai migliori dailers e dai più importanti studi di progettazione per la loro unicità e contemporaneità. In anni recenti il consolidamento del brand e il posizionamento su un mercato maturo e di alto profilo in continua ascesa ha trovato conferma nella realizzazione di un considerevole numero di progetti in ambito alberghiero, navale e dell'ospitalità in generale, in Italia e in diversi Paesi nel resto del Mondo.

The MAKRO company was founded halfway through the 1990s with the precise aim of developing innovative concepts and products for the bathroom, on the strength of solid knowledge linked to the culture of the project and of the business experience of the founding partners. From the very beginning, the idea has always been to manufacture products with new technical and construction features capable of satisfying planning requirements and solving building yard problems. A set of products has been conceived, made and industrialised on these assumptions, as well as on in-depth and constant research; such products were initially under-mount bathtubs and showers that have radically built a new way of thinking, planning and furnishing the bathroom. With precise and bold aesthetics and a rigorous design for a refined and demanding public, the products have been appreciated by the best retailers and by the most important design studios for their uniqueness and their contemporary appeal. In recent years, the strengthening of the brand and its positioning in a mature, high profile and continuously growing market have been confirmed by the fulfilment of a considerable number of projects in the hotel, naval and accommodation sectors in general, in Italy and in various Countries throughout the World.

MAKRO nace a mediados de los años noventa con el preciso objetivo de desarrollar conceptos y productos innovadores para el ambiente del baño basándose en su sólida formación, vinculada a la cultura del proyecto, y en las experiencias empresariales de sus socios fundadores. Desde el origen, su idea ha sido realizar productos con características técnicas y constructivas de nueva concepción capaces de satisfacer tanto los aspectos relacionados con el proyecto como las distintas problemáticas de la obra. Con estos presupuestos, junto a una profunda y constante investigación, se ha concebido, realizado e industrializado una serie de productos, inicialmente bañeras y duchas bajo encimera, que han marcado de manera radical un nuevo modo de pensar, proyectar y amueblar el espacio del baño. Dotados de una precisa y marcada connotación estética y de un diseño riguroso dirigido a un público refinado y exigente, sus productos han sido apreciados por los mejores distribuidores y por los estudios de diseño más importantes gracias a su unicidad y actualidad. En años recientes la consolidación de la marca y su posicionamiento en continuo ascenso dentro de un mercado maduro y de alto perfil han quedado confirmados con realización de un considerable número de proyectos en ámbito hotelero, naval y hostelero en general, en Italia y en distintos países del resto del mundo.

LA PRODUZIONE

THE PRODUCTION / LA PRODUCCIÓN

Le fasi di produzione dell'intera gamma in collezione avvengono in gran parte all'interno dell'Azienda. Per questo gli spazi sono stati progettati ed organizzati secondo un rigoroso layout che permette un'elevata rotazione dei cicli produttivi e ne garantisce la massima efficienza. È soprattutto per questo tipo di organizzazione che MAKRO è in grado di operare e di gestire con la massima flessibilità il "su misura" e la personalizzazione dei prodotti dell'intera collezione. L'esperienza e la professionalità del personale altamente qualificato, in costante aggiornamento formativo, e un parco macchine a controllo numerico di ultima generazione assicurano i più elevati standard qualitativi ed una capacità produttiva in grado di consentire una rapida evasione degli ordini. Centri di lavoro e di termoformatura dedicati al polistirene espanso ed estruso, macchine a CNC per la lavorazione dei diversi materiali di finitura quali vetro, solid surfaces Corian® / Makril, legno e alluminio, hpl ed altri materiali compositi, sono gli strumenti di un lavoro e di una ricerca a 360° condivisa con il dipartimento di R&S, vero fulcro di innovazione aziendale.

The production phases of the entire range of the collection are mostly carried out within the Company. This is why the spaces have been planned and organised following a rigorous layout to allow for a very high rotation of the production cycles while ensuring utmost efficiency. It is mainly thanks to this type of organisation that MAKRO is capable of operating and managing its "made-to-measure" service and of customising the products of its entire collection in a very flexible way. The experience and professionalism of very skilled personnel whose training is constantly updated and the latest generation of numerically-controlled equipment ensure the highest quality standards and a production capacity capable of allowing the quick execution of orders. Machining and thermoforming centres dedicated to expanded and extruded polystyrene, CNC equipment to machine the various finishing materials such as glass, Corian® / Makril solid surfaces, wood and aluminium, HPL and other composite materials; all these are thorough work and research tools that are shared with the R&S division, the real hub of company innovation.

En gran parte, las fases de producción de toda la gama de la colección se realizan en el interior de la Empresa. Por este motivo los espacios han sido proyectados y organizados siguiendo una rigurosa disposición que permite una elevada rotación de los ciclos productivos y garantiza su máxima eficiencia. Gracias a este tipo de organización sobre todo, MAKRO es capaz de llevar a cabo y gestionar con la máxima flexibilidad su producción «a medida» y la personalización de los productos de toda la colección. La experiencia y la profesionalidad de su personal, altamente cualificado y en constante actualización desde un punto de vista formativo, y un parque de máquinas de control numérico de última generación garantizan los más elevados estándares cualitativos y una productividad capaz de permitir el rápido despacho de los pedidos. Centros de trabajo y de termomoldeo específicos para el poliestireno expandido y extruido, máquinas CNC para trabajar los distintos materiales de acabado como el vidrio, solid surfaces Corian® / Makril, madera, aluminio, HPL y otros materiales compuestos: estos son los instrumentos de trabajo y de exhaustiva investigación compartidos con la sección de R&S, auténtico fulcro de la innovación empresarial.

Arrangement with Shower tray added in L-shape to the Bathtub-Washbasin System.

Arrangement with shower tray added in L-shape to the bathtub-washbasin system.

Particolare attenzione è riservata al connubio tra materiali naturali e tecnologia. Il risultato è l'utilizzo di due essenze di legno massello, hemlock e lati, che mediante un particolare trattamento termico possono essere impiegate anche in zone particolarmente umide del bagno. Hemlock è un'essenza dal tono caldo e venatura morbida, Lati ha carattere più deciso, colore scuro e venatura marcata.

Particular attention is paid to the merging of natural materials and technology. The result is the use of two essences of solid wood, Hemlock and Lati, which thanks to a particular thermo-treatment can be used also in the wet area of the bathroom. Hemlock is a warm toned wood with soft grain, Lati has a more determined structure, a dark colour and a distinctive grain.

Se pone especial atención a la síntesis entre materiales naturales y tecnología. El resultado es el uso de dos esencias de madera, Hemlock y Lati, que por medio de un especial tratamiento térmico pueden ser usadas en zonas húmedas del baño. Hemlock es una esencia con un tono acogedor y acabados sencillos, Lati tiene un carácter más intenso, color oscuro.

Con lo sviluppo del programma Sistemi vasca-lavabo-doccia Makro apre nuovi scenari interpretativi dello spazio bagno contemporaneo. Forma e funzione si fondono in un "unicum" capace di aprire la mente a nuove e inedite soluzioni tipologiche, compositive e materiche mai sperimentate prima d'ora. Il rigore dello spazio libero da ogni interposizione con lo spazio esterno esalta questa scelta compositiva del sistema vasca lineare in Corian® e della grande doccia Steel.

With the development of the program bath-washbasin-shower-systems Makro opens new ways of interpreting the contemporary bathroom. Form and function merge in a "unicum" capable to open the mind to new, unknown solutions of typologies, composition and materials, never experienced until today. The rigour of spaces free of interferences with the surrounding space underlines the choice of composition of the linear system with bath in Corian® surface and shower Steel.

Con el Sistemas bañera-lavabo-ducha Makro permite crear nuevos escenarios en la zona baño. Formas y funciones se funden en un concept que permite crear nuevas y únicas soluciones tipológicas, nunca realizadas hasta ahora. La necesidad de espacios libres de interposiciones con el ambiente externo exalta la elección compositiva del sistema bañera lineal en Corian® y de la gran ducha Steel.

VASCHE DA RIVESTIRE
BATHTUBS TO CLAD / BANERAS PARA REVESTIR

Nello schema grafico sono rappresentate le tre linee di vasche, ad alto contenuto tecnologico, rivestibili con qualsiasi materiale. La fattibilità “a misura” o “a disegno” di ogni singola collezione rende ogni realizzazione un oggetto unico.

The drawings show three, hi-tech bathtub lines that can be clad with any material. The “made-to-measure” or “made-to-drawing” option of each single collection makes each bathtub unique.

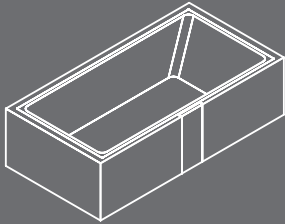

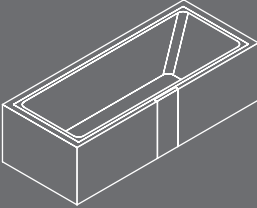

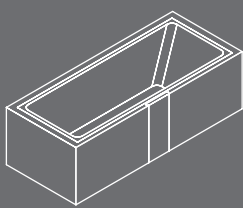

En el esquema gráfico aparecen representadas las tres líneas de bañeras, de alto contenido tecnológico, revestibles con cualquier material. La posibilidad de fabricar piezas «a medida» o «según dibujo» en todas las colecciones hace que cada composición resulte totalmente única.

WAVE

La linea Wave presenta un bacino rettangolare in tre differenti dimensioni: small, medium e large, per un confort adeguato ad ogni esigenza.

The Wave line has a rectangular tub in three different sizes: small, medium and large, for a comfort that suits all requirements.

El modelo Wave, presenta una pila rectangular en tres tamaños distintos: small, medium y large, con el fin de garantizar un confort adecuado para cada exigencia.

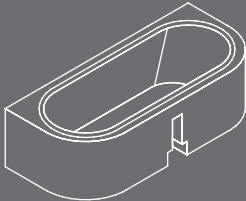

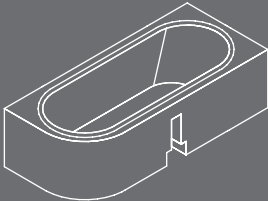

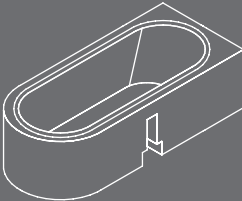

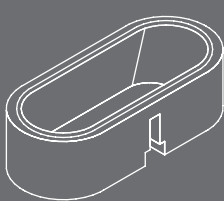

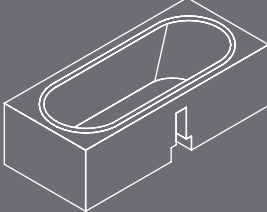

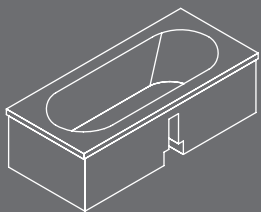

WAVE

ECLETTICO

Il modello Eclettico, con bacino ovale, viene proposto in versione Sovrapiano nella misura 170x75 o Sottopiano, a corpo rettangolare, in diverse dimensioni e circle con molteplici geometrie.

The Eclettico model with its oval tub is available in the 170x75 over-mount version or under-mount, with a rectangular body in various sizes as well as in the Circle version in many geometric shapes.

El modelo Eclettico, con pila oval, se propone en versión sobre encimera en la medida 170 x 75 o bajo encimera, con cuerpo rectangular, en distintos tamaños y Circle con múltiples geometrías.

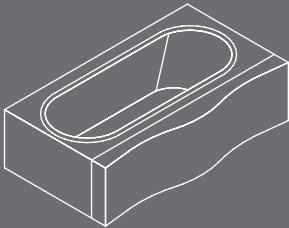

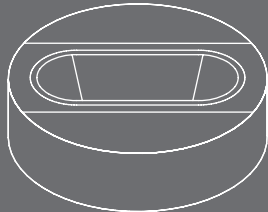

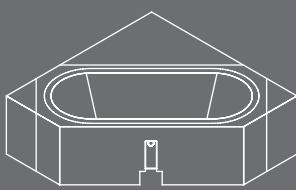

ECLETTICO

STREET

La vasca Street è di estrema pulizia formale con un contemporaneo bacino ovale in appoggio sulla struttura. Questa particolarità conferisce alla vasca una forte identità consentendo alla stessa di essere rivestita, top e fianchi, con ogni materiale.

The Street bathtub has very clean lines and a contemporary oval tub that is mounted over the structure. This detail gives the bath a strong identity and allows it to be clad with any material on the top and sides.

La bañera Street posee una extraordinaria limpieza formal con una moderna pila rectangular superpuesta a la estructura. Esta particularidad aporta una fuerte identidad y permite que la encimera y los costados de la bañera puedan revestirse con cualquier material.

STREET

VASCHE RIVESTITE
CLAD BATHTUBS / BANERAS RIVESTIDAS

Nel prospetto sono evidenziati i vari modelli di vasca disponibili con finiture esclusive di serie e con la possibilità di essere dotati di sistema idromassaggio-airpool e cromoterapia. La lavorazione “su misura” e la possibilità di personalizzare la finitura di rivestimento sono previste anche per queste categorie di prodotto.

The various bathtub models available with exclusive standard claddings are shown in these drawings; they can be equipped with an airpool hydromassage system and chromotherapy. The “made-to-measure” service, as well as the possibility of customising the finish of the cladding, are also available for these product categories.

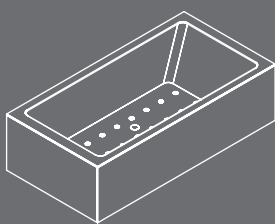

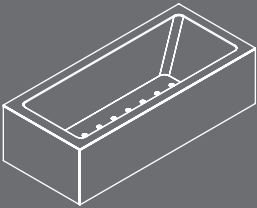

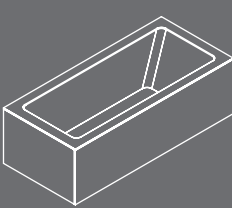

En el folleto se muestran los distintos modelos de bañera disponibles con acabados exclusivos de serie y con la posibilidad de incorporar el sistema de hidromasaje-airpool y cromoterapia. Estas categorías de producto también prevén la posibilidad de realizar productos «a medida» y de personalizar el acabado de revestimiento.

STYLE

TYPE COLLECTION / ACCESSORIES

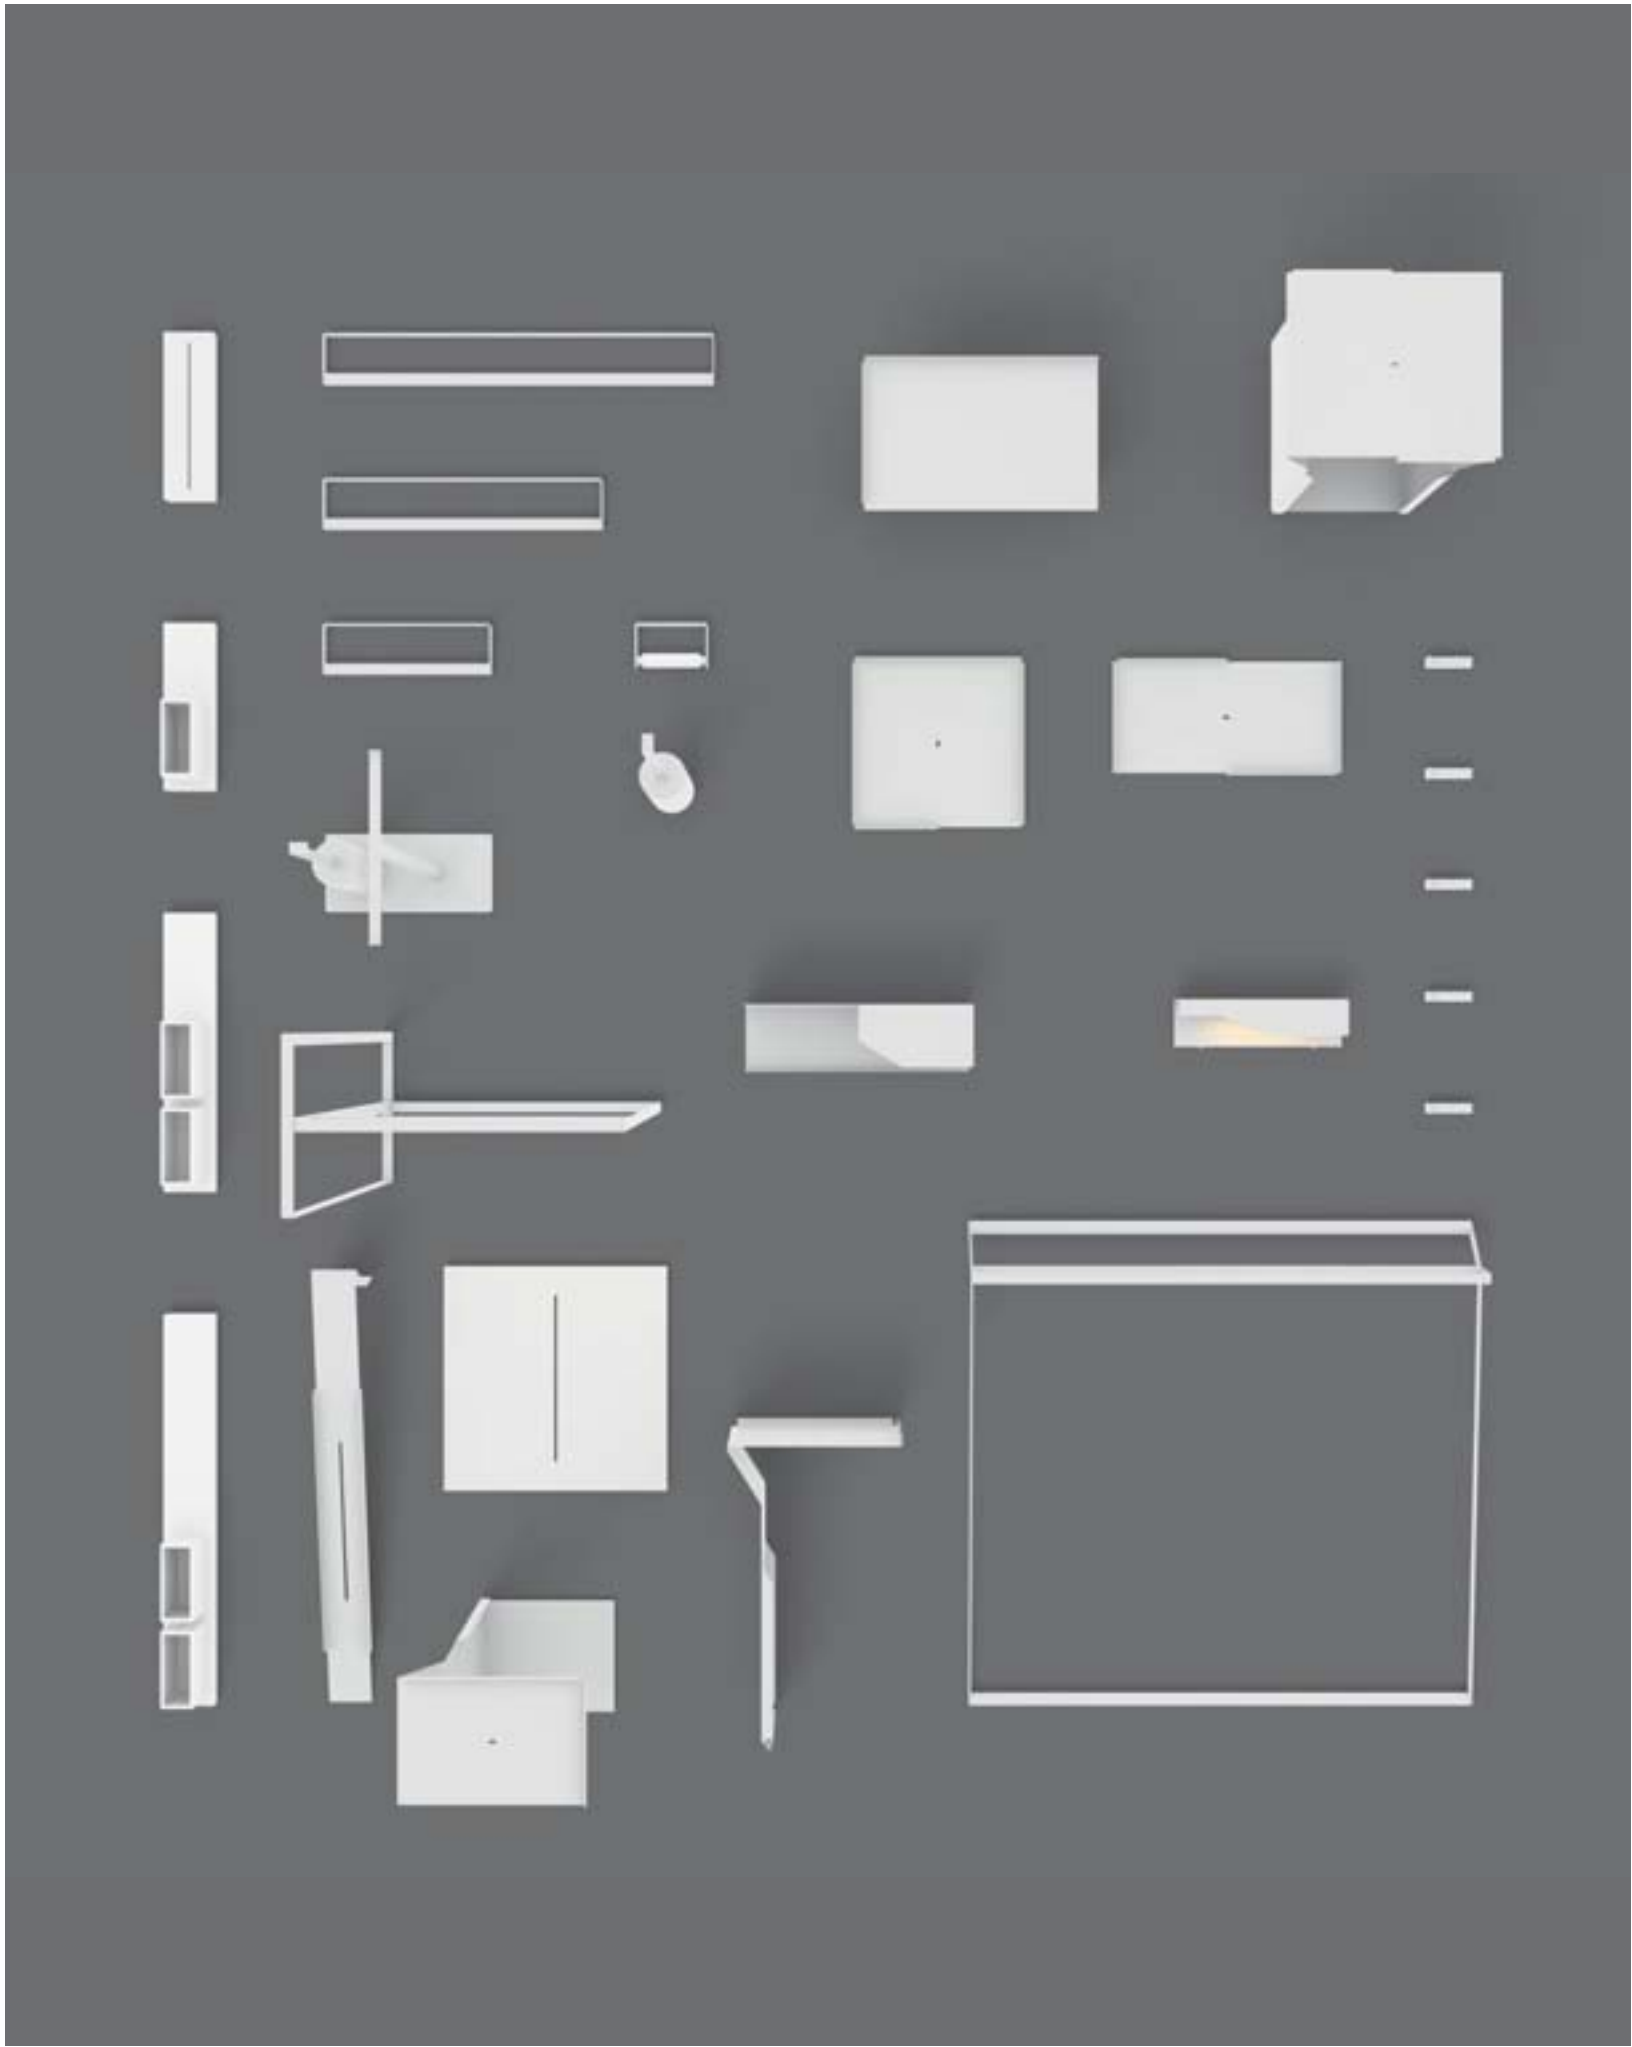

DESIGN / MARCO TAIETTA

Type Collection è una collezione di accessori di equilibrata eleganza. Leit-motiv della collezione è il metallo interpretato con tratto raffinato in un'ampia gamma di piani a servizio di vasche, docce, lavabi e sanitari e in un set di accessori lineari dal segno grafico distintivo.

Type is a accessories collection of contemporary elegance. Guiding theme of the collection is the artful interpreted metal material offering a wide choice of fittings for bathtubs, showers, vanities and sanitary ware, available in two colours white and graphite black.

Type Collection es una colección de accesorios de equilibrada elegancia. El motivo central de la colección es el metal, interpretado con trazo refinado en una amplia gama de encimeras para bañeras, duchas, lavabos y sanitarios y en un juego de accesorios lineales de signo gráfico distintivo.

Un equilibrato segno grafico è il tratto distintivo della serie Type Collection caratterizzato dalle linee rigorose a volte accentuate, altre appena accennate e da superfici piene ritmate da piccole piegature. Vassoi, mensole a muro, piani e tavoli di servizio per vasche e docce, si contrappongono al preciso segno grafico dei porta salvietta a muro, a isola e da parete e agli altri accessori di completamento.

A harmonic graphic style with a distinguishing touch is the Type Collection series, characterized by the rigorous lines sometimes accented and other times only shadowed on unique surfaces broken by little edges. Trays, shelves and side tables for bathtubs and showers holding up with the precise graphic lines of the towel rails and to the other accessories of this series.

Un equilibrado signo gráfico es el trazo distintivo de la serie Type Collection, caracterizada por sus líneas rigurosas a veces acentuadas y otras apenas insinuadas y por superficies macizas ritmadas con pequeños pliegues. Bandejas, repisas de pared, encimeras y mesas de servicio para bañeras y duchas se contraponen al neto signo gráfico del toallero mural, en isla y de pared, y a los otros accesorios que completan la composición.

Type Collection. Mensole a muro in composizione lineare e a lato, in composizione sfalsata. Tra i sanitari set-scopino e a lato bidet tavolo di servizio TT_table.

Type Collection, wall-mounted shelves in linear arrangement and in a staggered composition. Next to the sanitary ware the toilet-brush set and the side table TT-table.

Type Collection. Repisas de pared en composición lineal y, al lado, en composición escalonada. Entre los sanitarios, juego de escobilla y al lado bide mesa de servicio TT_table.

Type Collection. Mensola porta bicchieri in Corian® con supporto grafite nero. Mensola Sign in Corian®. A lato mensola sospesa in appoggio vasca nero grafite.

Type Collection. Cup holder and cups in Corian® with frame in graphite black. Shelf Sign in Corian®. On the side hanging side table for bathtub, graphite black.

Type Collection. Repisa portavasos de Corian® con soporte grafito negro. Repisa Sign de Corian®. Al lado, repisa suspendida superpuesta a bañera negro grafito.

Raffinato dettaglio del vassoio in Corian® per il piano d'appoggio del mobile lavabo Light30.

Refined details of the tray Corian® for washbasin shelf of Light30.

Refinados detalles de la bandeja de Corian® estante lavabo de Light30.

Type Collection. Geometrie rigorose e dettagli appena accennati per il vassoio rettangolo e vassoio quadro in alluminio disponibili entrambi in bianco e in nero grafite.

Type collection. Rigorous shake and just adumbrate details for the rectangular tray of aluminium, available in colours white or graphite black.

Type Collection. Geometrias rigurosas y detalles apenas insinuados en la bandeja rectangular y la bandeja cuadrada de aluminio disponibles en blanco y negro grafito.

Type Collection. Pagina accanto: portasalviette ad isola.
